

Saffron extract – safranal

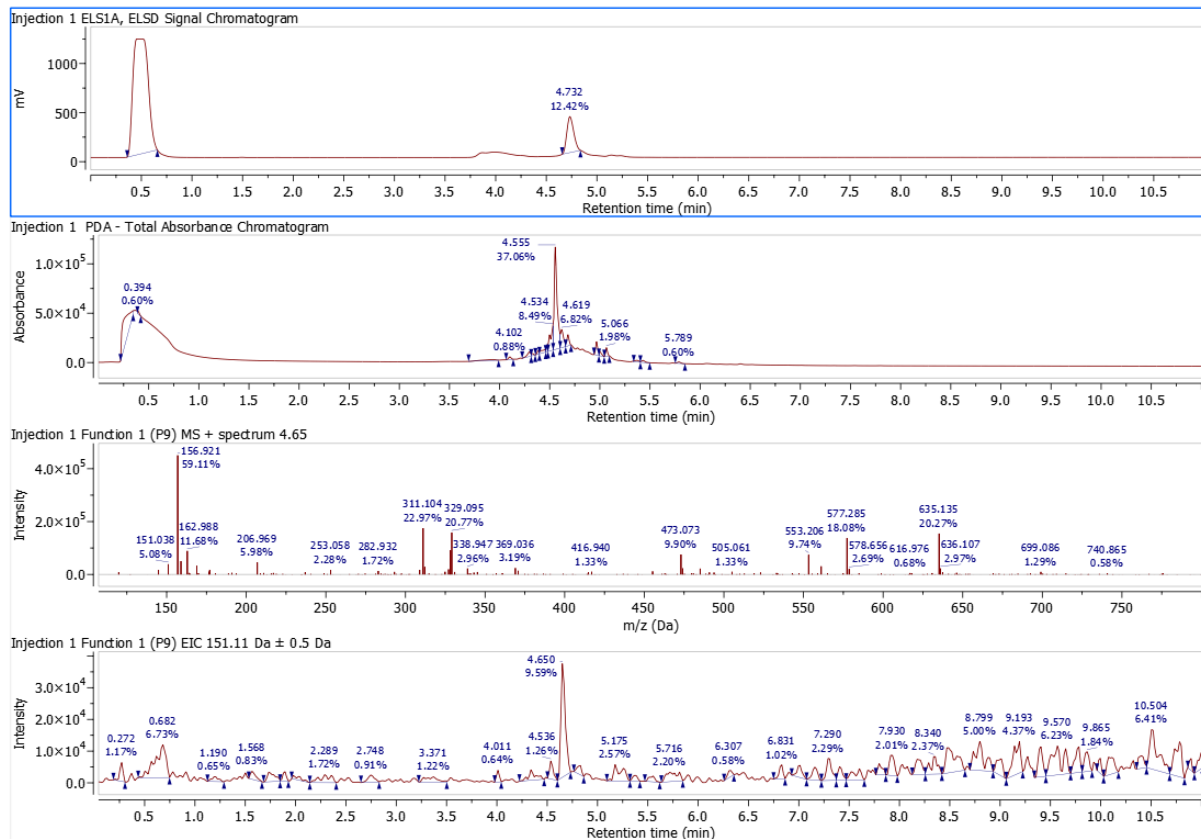

Red powder in poly vial

Expected MW: monoisotopic 151.11 (MH+)

Found: 151.038 (M+H+) as one of the masses of the dominant tailed peak

^1H NMR: sections of measured spectrum match predicted spectrum of target compound

qNMR: Dry sample contains $0.52 \pm 0.03 \%$ (w/w) of target compound

^1H NMR, d_6 -DMSO:

Predicted ^1H NMR spectrum:
